

ACT is a recognized industry program that certifies the skills and expertise of ceramic tile installers and finishers in key areas. Developed through the combined efforts of leaders in the tile and stone industry. ACT certifications now in AIA MasterSpec and incorporated into the TCNA *Handbook* under the Installer and Contractor Qualified Labor section, encouraging architects and designers to directly reference this level of expertise when developing specifications.

There are a total of **nine** available ACT Certifications, with each consisting of a written test, and a hands-on evaluation.

Installers decide which certification or certifications they want to pursue; installers do have the option to choose one, two, or all of the available nine ACT certifications.

NOTE: ALL installers interested in ACT are encouraged to attend both **ACT Orientation** and **TCNA Handbook & ANSI** class.

“ACT Certifications are available to ALL BAC Local 1HI tile members at no cost”

ACT Orientation
 Overview of all nine ACT certifications
Friday, June 19, 2026
 5:00 PM to 8:00 PM
